

## Miniature camping scene

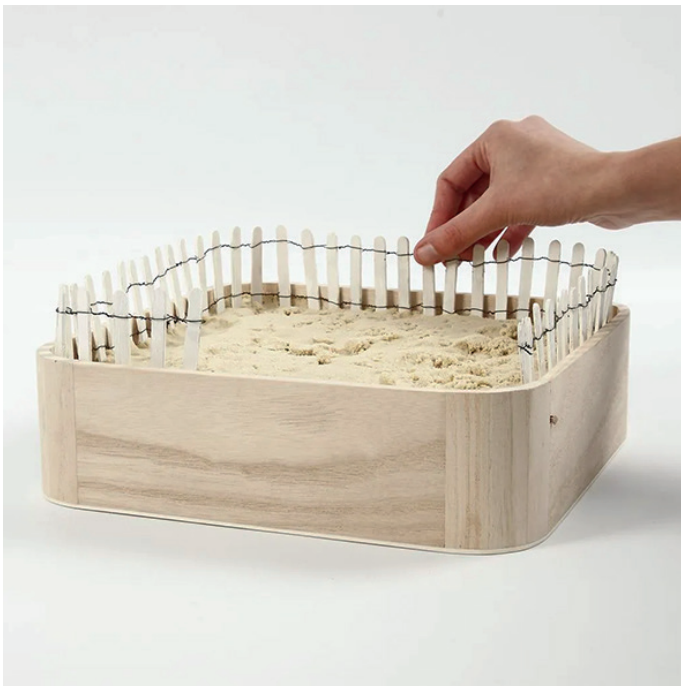

Today I would like to show you how to create a cute camping scene on a wooden tray.

Create your own little miniature world with a few simple materials and a little creativity.

1. Start by filling the box, using floral foam as the base and filling the surface with the sandy clay.

2. Make a garden fence by painting small wooden popsicle sticks according to your ideas and then connecting them together with the help of florist wire as shown in the picture.

3. Press the fence into the sand. If you want it to hold particularly well, you can also glue it to the inside wall at individual points.

4. Dig a depression in the sand for the pond and fill it with blue glass stones.

5. Then use flat wooden discs to create a path from the garden fence to the caravan entrance.

6. Now stick a flower stick deep into the sand behind the caravan and check that it is firmly seated in the Floral Foam underneath.

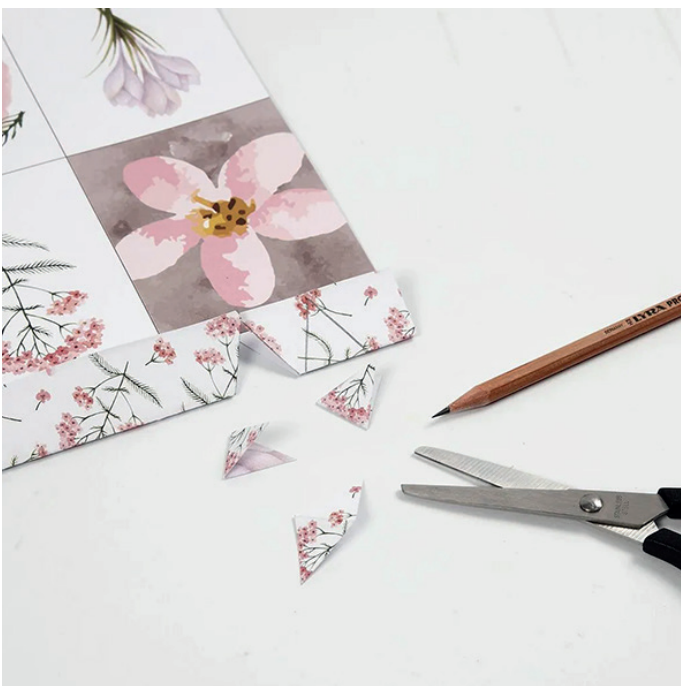

7. Fold the fairy lights three times so that the lights are staggered. Then connect the strands by twisting them slightly.

8. Place the centre of the fairy lights on the top of the flower stick and stick it there. Attach the two ends to the garden fence by wrapping them around a fence post.

You can hide the battery behind the caravan.

9. Fold over a piece of paper with a double-sided design by approx. 2 cm and cut out small triangles with the scissors to create triangles with different patterns.

Cut out as many triangles as you need for the garland.

10. Then stick all the pennants to the fairy lights between the lights.

11. Form a tiny wreath by wrapping some floral wire around two fingers. Attach small flowers to the wire wreath using a glue gun.

12. Complete the camping scene according to your ideas with furniture, plants, birds and anything else you like.

Unter den folgenden Artikelnummern findest du alles, was du brauchst:

Campingwagen: 20232826

Tablett: 20243412

Möbelset: 20243405

Sandy Clay: 20243406

Miniatur-Gartengeräte: 20243407

LED-Lichterkette: 20243408

Designpapier Rosa: 20243409

Eisstiele: 20233203

Holzscheiben - Sortiment: 20243410

Plus-Color Bastelfarbe: 20232892 (-001 - 017)

Steckschaum: 20243404
